LibKey Nomad: one-click access to articles

LibKey Nomad is a browser extension that can connect you to full-text journal articles instantly as you browse the internet. With just one click, you can retrieve articles from open-access sources like PubMed and Google Scholar, as well as publisher's websites and our specialist collection — without the hassle of repeatedly logging in.

The LibKey Nomad extension has been installed on all Trust PCs and laptops on both Edge and Chrome browsers so you can have immediate access to many full-text articles.

How LibKey Nomad Works

When you are browsing the internet, an icon will appear in the bottom-left hand corner of your browser when you find a journal article.

- If the icon says **"Download PDF"** or **"Article Link"**, simply click it to instantly access or download the full text.

- If the icon says **"Access Options"**, the full text isn't available but clicking it will open a request form.

You may need to log in with your OpenAthens account details at this point. Once logged in, submit the form, and we'll do our best to find a copy of the article for you. If you don't have an OpenAthens account, you can create one here.

You can install LibKey Nomad on your personal PC, laptop, or other devices and use it from anywhere.

Enjoy quick and easy access to research with LibKey Nomad!

Installation Guide

For Trust Laptops and PCs you don't need to do anything. The LibKey Nomad extension has been installed on both Edge and Chrome browsers so you can have immediate access to many full-text articles.

If you would like to install LibKey Nomad on your personal device:

1. **Download LibKey Nomad** – Visit the [LibKey Nomad download page](#).

2. **Choose Your Browser** – Compatible with Chrome, Edge, Firefox, Safari, Vivaldi, and Brave.

3. **Install & Activate** – After installation, find the **Extensions** button in your browser's toolbar (usually a jigsaw piece icon).

4. **Link to Your NHS Organisation** – Open LibKey Nomad and select Royal Papworth Hospital to connect with our available subscriptions and collections.
